Description

Trezeta men's shoes. Trekking shoes will reliably guide you through all hiking routes. Mountain shoes are designed in a modern outdoor design. The higher cut of Trezeta shoes ensures a higher degree of stability. The trekking shoes have a suede upper that has a water-resistant finish. The benefit of hiking boots is the water-resistant Trezeta® Waterstopper membrane, which protects the foot and keeps it dry.

The midsole of the forest boots ensures very good damping and cushioning. The strong point of hiking shoes is the Vibram® Predator II sole, which can overcome even very demanding terrain. Trekking shoes are a great choice for camping, hiking trails and outdoor adventures. Combine gray trekking shoes with hiking pants and a trekking t-shirt and set off on an interesting expedition.
