**Description**

Everett men's shoes. Trekking shoes are designed with an emphasis on support when tackling difficult hiking trails. The strength of outdoor footwear is functionality, which is ensured by the TexDryve membrane. Thanks to this membrane, hiking boots are water resistant and your feet are always dry.

The upper part of the trekking shoes is made of synthetic material and mesh, which allows for excellent air ventilation. The entire front part of the trekking shoes is reinforced with durable and strong material for a higher level of toe protection. FixBase technology strengthens the heel and ankle. Comfortable wearing is ensured by the padded interior and massively padded collar of the forest boots. Footarch Support helps with proper footing. The loop on the back of the mountain boots is used for easier putting on and taking off. The articulated sole of outdoor shoes for men has an excellent grip in all directions. Gray shoes with red elements are an ideal choice for camping, outdoor trips, trekking expeditions and tourist expeditions.

**Product details:**
