**Suggested retail price:** 26.99 € s DPH

### Description

Arena swimming goggles. Sports glasses are an excellent aid for swimmers. The swimming goggles have a white and black design that complements the blue lenses and details. They have a minimalist brand logo on the sides. Colored glasses have a slightly larger size, which offers you an even better view. This model is more suitable for men. Their seal is made of one piece of material. The One glasses were created based on studies of the human face and glasses. The branded swim goggles are very similar in shape to the Cobra Ultra goggles. They offer you wide peripheral vision.

Arena glasses have a split strap for maximum comfort. They are easy to tighten and can be quickly adjusted to your size. The self-adjusting beam is another plus, thanks to which they are suitable for every type of face. Swimming goggles have hard polycarbonate lenses, which are a guarantee of protection against UV radiation and do not fog up. They offer a very good seal. The glasses are suitable for indoor and outdoor pools. Professional swimming rings are an excellent choice for training for both beginners and advanced swimmers. Also suitable for triathlon.
