Description

Men's jacket by Northfinder brand. Men's hiking jacket made of functional softshell material, which is an excellent companion in nature. With its two-tone blue design, it will please stylish tourists. The softshell jacket has a waterproof and water-resistant membrane, so you won't be surprised by bad weather. At the same time, the mountain jacket retained its breathability. The hiking jacket is also versatile for other outdoor activities such as trekking, ski mountaineering or free time.

The trek jacket has a classic cut, suitable for any lover of outdoor activities. The trekking jacket has ventilation panels on the sides and back. Strategically placed zones of synthetic insulation simultaneously release and accumulate your body heat. The jacket has a built-in hood, which together with the higher collar creates excellent protection against wind and cold. The hooded jacket closes with a YKK zipper, which is a sign of quality, and has a chin guard on the neck. The bottom hem of the trekking jacket can be pulled down at the sides. The important part is the reflective elements, several outer pockets and one inner one.
