Suggested retail price: 29.99 € s DPH

Description

Under Armor gloves. Women's gloves are suitable for wearing in adverse conditions. They have a waterproof UA Storm treatment, so water runs off them and does not penetrate inside. Despite the waterproof treatment, the gloves are sufficiently breathable. They are made of very pleasant Armor Fleece material, which is light, breathable and flexible. The gloves do not restrict movement. They have a reinforced part in the palm area.

Gloves for ladies have a pleasant warm interior made of combed fleece. They are therefore also suitable for cold days. The winter gloves have a special Tech Touch material on the tip of the finger and index finger, which allows you to use touch devices without having to take off the gloves. On top of the thumb there is an extra soft Speedwipe fleece fabric. Under Armor gloves have an extended elastic wrist cuff for a perfect fit.
