Description

Moon Boot women's shoes. Boots for ladies in an unmissable black and white combination and a trendy animal pattern - cow print. Tall stylish snow boots are made of waterproof material that guarantees 100% water resistance. The insulated interior of the boots will keep your feet warm and dry, so they are the right choice for cold winter days and evenings. Easily combinable women's winter boots in which you will be unmissable.

Women's boots have a non-slip sole, which also provides thermal insulation. They are suitable for every type of foot. Thanks to the lacing, you can easily adapt them to your needs, and since the laces are pulled from the top, you prevent unwanted snow from entering. The stylish Moon Boot can be used for a walk in the city, on the way to work or for time spent with friends.

The Moon Boot is inspired by the first man landing on the moon in 1969. So if you thought the words "cow" and "moon" didn't belong together, you're wrong. High winter boots perfectly insulate your feet from the cold thanks to the durable edging that wraps around these trendy women's boots. Simply boots for the winter that no modern woman must miss.

The manufacturer does not recommend the use of impregnations, which may damage the surface material.
