Description

Tire brand Maxxis. A cycling tire that can be easily folded thanks to the material it is made of. Extended lugs provide even more support. The bike tire has slanted front edges for even more speed and slats to create a smooth transition when leaning the bike. Thanks to this, you can easily keep the tire tread under control.

The folding bicycle tire is ideal for aggressive riding and trails in difficult terrain. EXO Protection+ technology combines the two best materials for protection against punctures or defects. Tubeless Ready technology - tubeless tire, provides better traction and lower rolling resistance.

Product details:

- suitable for wheels with a diameter of 29"
- folding cloak
- wide lugs on the tread for more support
- excellent control when braking
- suitable for aggressive driving and trails
- TPI: 120
