Description

Under Armor men's shoes. Trekking shoes for men in a modern outdoor look impress with good functionality. Men's hiking boots are made of high-quality materials. Outdoor shoes are very comfortable and have a light construction. Hiking boots are suitable for all-day hiking or being outdoors. The upper part of the forest boots is breathable, so your feet will be dry even after a whole day in the field. The heel and toe are additionally reinforced for better foot protection.

The hiking boots have an antimicrobial and shaped Insite® Contoura® Support insole that prevents foot fatigue. The foam insert perfectly absorbs shocks. The Micro G® foam midsole provides excellent cushioning. Trekking shoes for men have a rubber sole that is resistant to abrasion, provides high traction for better grip on various surfaces. Forest boots have a loop at the back to help you put them on and take them off. Classic lacing. Black Under armor shoes are great companions for trekking, outdoor expeditions and trips.
