**Suggested retail price:** 189.99 € s DPH

### Description

Icebug men's shoes. Ankle winter boots have two main goals: reducing the use of plastics in footwear and ensuring a comfortable climate for the feet. The use of 100% hemp and wool filling in the collar and tongue creates great thermo-regulatory properties - cooling feet when it's warm and warming when it's cold.

Nubuck leather makes the shoe water-repellent where it needs it most. The upper part of the winter footwear has a waterproof surface treatment. Water repellency can also be increased by applying natural beeswax. Icebug winter boots are stable and well cushioned to support the feet. Shoes for winter will please you with a great sole design with extra grip. Larvik branded shoes care about sustainability. Black shoes are the perfect choice for everyday wear, to the city and for walks in nature.
