Description

Thermopad heating insoles for shoes. Disposable thermal insoles for shoes based on activated carbon. Activated carbon heaters consist of a mixture of natural substances: iron powder, salt, activated carbon, water and vermiculite. This mixture is surrounded by a soft membrane that allows oxygen to enter. In connection with oxygen, the iron powder is heated. The boot warmers are designed in such a way that heat is generated immediately after opening the airtight package.

Disposable heating inserts for shoes are suitable for all fans of winter activities, whether it is sports, hunting, or watching sports in stadiums. Each of you has experienced the unpleasant feeling of cold feet and hours spent in freezing weather. Heating insoles for winter shoes are a simple solution that will ensure your feet feel warm for about 8 hours.
