### Description

Fjallraven brand backpack. The Fjallraven Kanken backpack has been the brand's best-selling product since its launch. It is made of highly resistant synthetic material Vinylon F, which resists moisture and is easy to clean. The backpacks were designed so that you have the right posture and your back doesn't hurt. The Fjallraven branded backpack is in a trendy dark purple design. The classic backpack is suitable for school, work, travel, hiking and many other occasions. The purple bag has a main compartment with a zip closure. Two side open pockets will serve to store a water bottle or an umbrella. You can use the front zip pocket to store small items.

A PE foam cushion is attached to the back, which prevents things in the rucksack from pressing on you. You can also use it as a cushion outside if you want to sit down somewhere right away. You can wear the Fjallraven backpack as a rucksack, but also practically grab the handle as a bag. It has a reflective logo on the front for proper protection. It also has a name and address label inside the main compartment. The plain-colored backpack has adjustable shoulder straps that you can quickly and easily adapt to individual needs. The Kanken Fjallraven backpack has dimensions of 38 x 27 x 13 cm, its volume is 16 L and it weighs only 300 g.
