Description

Fjallraven brand backpack. The Fjallraven Kanken backpack has been the brand's best-selling product for over 35 years. It is made of highly durable Vinylon F material, which resists moisture and dirt. The backpacks were designed so that you have the correct posture and ensure a straight back. The branded backpack Fjallraven is in a distinctive yellow design, in the "warm yellow" shade, which is very trendy. The classic backpack is suitable for school, work, traveling or nature. The yellow bag has a main compartment with a classic zipper closure. Two side open pockets where you can store a bottle or an umbrella. Front pocket with zipper, which is used to store small items and a mobile phone.

There is a PE foam cushion attached to the back, which prevents you from being pressed by things stored in your backpack. You can also use it as a cushion outside for sitting. You can wear the Fjallraven backpack as a rucksack, but also practically grab the handle as a bag, depending on what you prefer. The backpack has a reflective logo. It also has a label inside the main compartment to write your address and name. The plain-colored backpack has adjustable shoulder straps that you can easily adjust. The Kanken Fjallraven backpack has dimensions of 38 x 27 x 13 cm, a volume of 16 L and weighs only 300 g.
