Description

Trezeta men's shoes. Argo WP is a comfortable hiking shoe, ideal for pleasant walks in the forest or for safe walking on mountain trails. Thanks to the special construction, trekking shoes guarantee excellent anatomical stability. The soft waterproof upper of the hiking boot fits comfortably on the foot, while the breathable mesh lining facilitates optimal climate comfort inside the boot.

To effectively protect the interior from the elements, Trezeta has developed the Trezeta Water Stopper technology, a membrane that prevents external elements from penetrating the shoe. A dual-density EVA midsole cushions footing to reduce ground impact, minimize vibration, and guide steps.

The Argo WP trekking shoes are simple but high-quality shoes for the forest thanks to the Vibram® Multiland sole, which ensures maximum adaptability. The design of the mountain shoe has a large contact zone in the front to improve grip on the ground and ensures excellent grip on all types of terrain.

Product details:

- waterproof hiking boots
- special construction for anatomical stability
- waterproof membrane Trezeta Water Stopper Membrane
- molded polypropylene insole
- EVA midsole
- reinforced tip and heel
- pleasant and comfortable insole
- weight: 455 g 1/2 pair
