### Description

Bauer men's skates. Hockey skates for men are intended for recreational hockey players. They are made of 3D Poly Carb bottom material. The shoe is set to hold the foot at an angle that allows for faster turns and acceleration. Padding with anaform ankle pads foam material provides support for the ankle and heel and can be perfectly adapted to it by the pressure and heat of the foot.

Hockey skates have an anatomically shaped tongue with an external instep protector that protects the leg from puck impacts. Bauer skates have an inner microfiber lining that prevents excessive sweating and provides comfort even during a longer game. The tip of the hockey skates is made of hard plastic. The leg and fingers are thus protected from cuts or other impacts during the game. Men's hockey skates have a sole made of TPR material, which prevents it from undesired twisting and ensures the best possible transfer of energy expended by the player to the blade. Men's hockey skates have a TUUK Stainless knife made of stainless steel, which is fixed on a TUUK Lightspeed Pro II holder.

### Product details:

- intended for recreational players
- durable material 3D Poly Carb
- they support acceleration and faster turns in the game
- foam padding for greater comfort and ankle and heel support
- anatomically shaped tongue
- microfiber lining prevents excessive sweating
- hard plastic tip protects fingers from impacts
- TRP sole
- knife made of stainless steel TUUK Stainless
- knife holder TUUK Lightspeed Pro II
