Description

Everett women's jacket. Women's softshell jacket for all active women in a trendy red color. The women's transitional jacket is suitable for hiking and an active stay in nature. Thanks to the softshell material, it optimally regulates heat and provides excellent protection against wind and cold. The material dries quickly, but at the same time remains breathable. The admixture of spandex will allow you freedom of movement in all directions. The red hiking windbreaker has a higher collar with chin protection and a removable hood. The hood with a visor is attached with a zipper. It can be pulled down thanks to the elastic cords.

The trekking jacket fastens with a YKK zipper. From the bottom side, the zipper is supplemented with a protective layer against wind and cold. You can adjust the outer cuffs thanks to Velcro. The women's trekking jacket has a bottom hem that can be pulled down with an elastic band. The hiking jacket has practical side pockets with a zip, which are decorated with the brand logo. Another zipped pocket is located on the chest. The zippers have a contrasting white color. One small pocket can be found inside the sports windbreaker. The inside of the trekking windbreaker is lined with waffle fleece in a contrasting color. The bonus is reflective elements that will make you more visible even in poor conditions. They are located on the sleeves and hood. The branded jacket is the right choice for hiking, nature or walks.
