

## Bicycle pump LONGUS-HIVOPRE ALU-T 80/120 clever s manometrom

**Available sizes**

**Reference number**

**Ean number**

**Quantity**

**Suggested retail price:** 19.99 € s DPH

### Description

Longus bicycle pump. The pump has the option of switching the High volume and High pressure functions. These functions allow to efficiently and quickly inflate MTB tires with a large volume and road tires with a higher required pressure.

Clever valve with closing lever automatically adapts to the type of valve (AV/FV). The precise manometer is placed so that you can check the current pressure while blowing. The advantage is the ergonomically shaped folding T-handle. The holder for the basket is included in the package.

### Product details:

- Length: 280 mm
- Valve: reversible AV / DV / FV
- Maximum pressure: 120 PSI / 8.30 BAR
- Weight: 164 g
