Description

Fjallraven brand backpack. The Fjallraven Kanken backpack has been the best-selling product of this brand ever since it was launched on the market in 1978. It is made of very durable Vinylon F material, which is highly resistant to moisture and very easy to clean. The backpacks were designed so that you have a correct posture and a straight back. The Fjallraven branded backpack is in a very trendy burgundy design. The stylish backpack is also suitable for school, work or walks in nature. The burgundy bag has a main compartment with a classic zipper, and two side open pockets where you can store a water bottle or an umbrella. The front pocket with a zipper will certainly serve to store smaller items.

The back part of the backpack includes a PE foam pad. It will prevent you from being pressed by things stored in the backpack or you can also use it as a cushion outside. It also helps keep your back straight. You can wear the Fjallraven backpack as a rucksack, but also practically grab the handles as a bag. The backpack has a reflective fox logo on the front. Inside the main compartment, it also has a label to indicate your name, or your address or phone number. The plain-colored backpack has adjustable shoulder straps. You can customize them as you like. The Kanken Fjallraven bag has practical dimensions of 38 x 27 x 13 cm, its volume is 16L. The backpack weighs only 300 g.
