Description

Men's jacket by Northfinder brand. The trekking windbreaker is designed in a two-tone design. There is also a practical hood that comes in handy in dry and windy weather. The strong point of the hiking windbreaker is the softshell material, which is extra durable. At the same time, it is windproof and breathable, so even a sudden change in weather won't surprise you.

Functional jacket for men has high water resistance and breathability. The trekking jacket has a water-resistant finish that does not contain PFC compounds. The advantage is reflective elements that improve your visibility in poor light conditions. The red-blue windbreaker is an ideal choice for trekking, camping, outdoor expeditions and tourist trips.
