Description

Tecnica men's shoes. Light trail shoes are intended for experienced runners who like to overcome challenging running routes in nature. Magma S shoes are designed specifically for light hiking, trail running or climbing in all kinds of technical mountain terrain. It is about the so-called all-mountain trail shoes. They will provide you with a new level of stability on different surfaces, protection of the feet and have the advantages of light and breathable shoes. You can easily customize trail running sneakers thanks to classic lacing. Tecnica shoes adhere very well to the foot.

Terrain All-mountain boots have a unique pattern inspired by MTB tires. Sole with Vibram Litebase technology and Megagrip compound. This rubber offers exceptional grip on all surfaces, both dry and wet. Outdoor running sneakers have an enlarged heel shape thanks to two rubber stabilization ribs on the sides of the heel. Running shoes will thus ensure unrivaled efficiency of braking downhill, even on rubble or gravel. The rocker midsole has a

unique rounded toe shape, which increases the reactivity of the shoes, their acceleration and braking. Trail shoes can be shaped to fit the runner in the heel and arch area. The shoe has a pre-shaped inner insole.
