XL / 29"	772085	8592772119629	3+

**Suggested retail price:** 2319.99 € s DPH

**Description**

Amulet electric mountain bike. Mountain e-bike eRival 4.5 with the latest BAFANG M410 electric motor, which is developed for optimal transmission of power when driving. It has a power of 250 W and a maximum torque of 80 Nm. In conjunction with the IPS battery, which uses Samsung cells, with a capacity of 720 Wh, it provides enough energy for long trips.

The system reaches a range of 50-150 km, depending on the selected level of support. The ebike eRival 4.5 is equipped with a 10-speed S-RIDE M400 set and a cassette with a range of 11-40 teeth. In combination with the SR SUNTOUR suspension spring fork and hydraulic brakes, the eRival 4.5 electric bike is a great choice for long cycling routes. The WALK function is also an advantage, which helps when pushing the electric bike, either uphill or on the flat.

The electric bicycle has a very powerful Samsung 720 Wh battery. It is a high-capacity Samsung Li-Ion 720 Wh/20 Ah battery, which is partially integrated into the frame of the electric bicycle. The battery supplies energy to the entire system, and thanks to its central storage, your ebike is perfectly balanced, stable and easy to control. The battery can take you up to 150 km on one charge (depending on the surrounding conditions and level of assistance). Of course, there is a BMS board (Battery Management System), which protects the battery from overheating, overcharging or short circuits. You can charge the battery on the bike rack or remove it and charge it outside the bike. The battery can be charged to its maximum capacity in 5 hours. The price of the bike also includes a Samsung battery charger.

**Technical parameters**

Frame	AMULET 29" ALLOY LITE E-SG4 / AXLE 12MM / 142MM
Fork	ZOOM 862 AIR RL/O 15MM
Transfers	1X10
