Description

Amulet women's electric mountain bike. The women's ebike attracts attention not only with its modern appearance, but also with its technical parameters. The eRival 5.0 women's electric bike has the latest BAFANG M410 electric motor, which is developed for optimal transmission of power when riding. It will delight you with 250 W power and a maximum torque of 80 Nm. In conjunction with the IPS battery, which uses Samsung cells, with a capacity of 720 Wh, it provides enough energy for long trips. The WALK function is also an advantage, which helps when pushing the electric bike, either uphill or on the flat.

Depending on the chosen level of support, the system can reach a range of 50-150 km. The eRival 5.0 model is equipped with an 11-speed S-RIDE M410 set and a cassette with a range of 11-50 teeth. In combination with the SR SUNTOUR spring fork and hydraulic brakes, the eRival 5.0 mountain ebike is the right choice for cycling trips.

The electric bicycle has a high-performance Samsung 720 Wh battery. It is a high-capacity Samsung Li-Ion 720 Wh/20 Ah battery. It is partially integrated into the frame of the electric bicycle. It supplies energy to the entire system, and thanks to its central mounting, the ebike is perfectly balanced, stable and easy to control. The battery can take you up to 150 km on one charge (depending on the surrounding conditions and level of assistance). It is also equipped with a BMS board (Battery Management System), which protects it from overheating, overcharging or short circuits. You can charge the battery on the bike rack or remove it and charge it outside the bike. A fully charged battery can be charged to maximum capacity in 5 hours. The price of the bike also includes a Samsung battery charger.

Technical parameters

Frame	AMULET 29" ALLOY LITE E-SG4 / AXLE 12MM / 142MM
Fork	SR SUNTOUR XCM32 RL-R 15MM
