XL / 29"	772080	8592772119582	3+

Suggested retail price: 2479.99 € s DPH

Description

Amulet electric mountain bike. The eRival 5.0 mountain ebike impresses with the latest BAFANG M410 electric motor, which is developed for optimal transmission of power when driving. It will delight you with a power of 250 W and a maximum torque of 80 Nm. In conjunction with the IPS battery, which uses Samsung cells, with a capacity of 720 Wh, it provides enough energy for long trips. The WALK function is also an advantage, which helps when pushing the electric bike, either uphill or on the flat.

The system reaches a range of 50-150 km, depending on the selected level of support. The eRival 5.0 model is equipped with an 11-speed S-RIDE M410 set and a cassette with a range of 11-50 teeth. In combination with the SR SUNTOUR fork and hydraulic brakes, the eRival 5.0 is a great choice for long trips into nature. Enjoy the ride to the max!

The price of the bike also includes a Samsung battery charger. It is a high-capacity Samsung Li-Ion 720 Wh/20 Ah battery. It is partially integrated into the frame of the electric bicycle and supplies energy to the entire system. Thanks to its central mounting, the electric bicycle is perfectly balanced, stable and easy to control. The battery will take you up to 150 km on one charge (depending on the surrounding conditions and level of assistance). It is also equipped with a BMS board (Battery Management System), which protects it from overheating, overcharging or short circuits. You can charge the battery on the bike rack or, if necessary, remove it and charge it outside the bike. A fully charged battery can be charged to maximum capacity in 5 hours.

Technical parameters

Frame	AMULET 29" ALLOY LITE E-SG4 / AXLE 12MM / 142MM
Fork	SR SUNTOUR XCM32 RL-R 15MM
