Description

Fischer hockey stick. The Fischer CT250 hockey stick is suitable for senior hockey and ball hockey players. Composite hockey stick, or its construction was made using Poly-Air-Bond Blade and Mono-Comp technologies. Thanks to them, it has low weight and at the same time high resistance. The RHT (Responsive Hosel Tech) technology also contributes to the excellent resistance, which significantly increases the overall stiffness and strength without any unnecessary extra load.

CT250 SR Grip hockey stick with CAP finish provides the player with a great grip, feeling for control over the puck and protects the surface of the stick against abrasion. It uses Cap Tech technology , which protects the shaft and extends its life. Thanks to the Plain Tech 3k technology , the carbon shaft construction has a lower weight and enables better performance.

Product details:

- quality hockey stick for seniors in hockey and hockey ball
- Cap Tech technology increases the durability of the shaft
- Poly-Air-Bond Blade technology increases flexibility and a better feel for the game
- Mono-Comp technology
- RHT technology increases the stiffness and strength of the hockey stick
- shaft grip treatment
- lightweight construction allows for better performance
- stick hardness (flex): 85
- bend: 92
- total length: 168 cm
- length to hem: 150 cm
- weight: 520 g

How to proceed when choosing the right hockey stick/blade bend?

- If you hold the hockey stick with your left hand down, order the L side (bend the blade to the right)
- If you hold the hockey stick with your right hand down, order side P or R - (blade bend to the left)
