Description

Adidas men's shoes. Trekking shoes are designed in a modern outdoor design that will be appreciated by stylish hikers. Emphasis was also placed on the functionality of trekking shoes. Terrex hiking boots are must-have footwear for all enthusiasts of hiking and tackling mountain trails.

The hiking boots have a durable yet breathable mesh upper. This material is additionally reinforced in the most stressed parts, such as the toe and heel. Men's trekking shoes are also made of recycled Primegreen material.

Boots for the forest, thanks to the shaped insole inside and the padded collar of the shoes, ensure super comfort. The lacing makes it possible to customize men's mountain boots according to individual ideas and needs. Men's outdoor shoes have a grippy Continental sole with lugs. Their dual-density midsole combines the comfortable cushioning of running trail shoes and the stability of outdoor shoes, so they won't get lost even on ascents or via ferratas.
