Description

Adidas junior shoes. Trekking shoes attract attention not only with a modern outdoor design, but also with great functionality. Boots for the forest have a classic cut that fits every type of foot. The advantage of hiking boots for juniors is quick lacing.

The strength of the outdoor shoes is the durable ripstop upper and the shaped durable toe made of TPU material. The Gore-tex membrane ensures excellent breathability and waterproofing. Trekking shoes have a light midsole made of EVA material, which is a guarantee of excellent cushioning and shock absorption. The Continental™ sole has a very good grip even on wet surfaces. Black adidas shoes are the best choice for conquering hiking trails, for trekking, camping and outdoor expeditions.
