Description

Arena junior swimming goggles. The One Mask swimming goggles have the shape of a mask, making them an ideal replacement for classic swimming goggles. They have a larger size, are very soft and extra comfortable. They easily fit the nose and seal most of the child's face. Thanks to the extended peripheral vision, underwater children have a better overview of everything that is happening around them. Children's swimming goggles are intended for children aged six to twelve years. They have a unique design designed for girls that will adapt to most young swimmers. Glasses for children will provide them with crystal clear vision. The cushion seal protects against water ingress. They have integrated UV 400 protection for safe use even in the sun.

The swimming goggles for children have a purple lens, a light pink frame and a pink strap. The strap is adjustable. You can easily adjust it as needed by tightening it. Arena pink glasses can be used in indoor and outdoor pools. Arena children's swimming goggles have a one-piece seal. The branded glasses have hard polycarbonate lenses that guarantee a great view underwater. The glasses are equipped with an anti-fog coating and are PVC-free.
