Description

Under Armor men's shoes. Trail shoes impress with their sophisticated design and technical performance. The combination of the dark blue color of the upper and the red sole will attract attention at first sight. There is also an Under Armor logo. Thanks to the classic lacing, you can perfectly adapt the men's trail shoes to your foot.

The upper of the trail sneakers is light, durable and allows for excellent air ventilation. Comfort when running on unpaved terrain is ensured by the Ortholite® insole, which is made of recycled material. The strength of trail running shoes is the UA HOVR™ cushioning that reduces impact. A bonus of UA HOVR™ technology is excellent energy return. Trail sneakers for men have a Vibram® sole with a unique design of traction lugs. The Vibram sole is extremely durable and suitable even for difficult terrain. Under Armor running shoes are perfect companions for running on dirt roads, in the forest and on unpaved terrain.
