Description

Women's sweatshirt brand 4F. The sweatshirt for ladies catches the eye with its distinctive color and functional design. The sweatshirt has quick-drying material and reflective elements. It is suitable for sports and training. The 4F sweatshirt is elastic, so it adapts during sports. Raglan sleeves do not hinder movement. A bonus is the lining made of combed material with 4F Warm technology, which pleasantly warms and guarantees thermal comfort in colder weather.

The sweatshirt is suitable for sports, for example as a sweatshirt for running or training in nature. Another advantage is the high collar with ventilation panel, which you can pull out in bad weather. The running sweatshirt has two zipped pockets on the sides. Flat seams also contribute to comfort, and the cuffs are finished with thumb holes. The running sweatshirt is intended for all active women.
