Description

Men's jacket brand 4F. The men's windbreaker appeals with a modern look with stitching. A plus is the built-in hood, which comes in handy in dry weather. The stand protects against wind and cold. The main zip is also covered with an internal wind-resistant flap.

The strength of the autumn jacket is the surface hydrophobic impregnation of the material, which prevents the penetration of moisture. The synthetic filling will take care of the warmth. The men's windbreaker has a pleasant lining that guarantees comfort when worn. The blue jacket for men is ideal for everyday wear, for work, for the city and for leisure activities.

Product details:

- integrated hood
