### **Description**

Women's t-shirt brand 4F. The T-shirt with short sleeves is suitable for exercise or training. It is light and pleasant to wear. The proportion of elastane makes it slightly flexible and thus adapts to your figure when you move. The sports t-shirt is quick-drying and thanks to the perforations on the back and front, it provides proper air circulation. You can use the red t-shirt for running, exercise or other favorite activity.

The 4F t-shirt has a classic cut and a round neckline. Flat seams prevent skin irritation and provide comfort. The women's T-shirt uses 4F Dry technology, which ensures proper moisture removal. The functional t-shirt for ladies also has reflective elements that improve your visibility in poor conditions.
