Description

Women's sweatshirt brand 4F. The running sweatshirt in black stands out for its functionality and reflective elements, which you will appreciate in poor conditions. The black sweatshirt is made of light and quick-drying material with 4F Dry technology. The women's sweatshirt is flexible and thanks to the functional cut and raglan sleeves, it will give you maximum freedom of movement when running.

The running sweatshirt has a pleasant interior made of brushed fleece, so it will provide thermal comfort even on cold days. You will appreciate the gentle stand in the wind. The 4F sweatshirt closes with a zipper, which ends with a chin guard. Flat seams also prevent skin irritation. A bonus is the back pocket with a zipper, which can be used to store small items or an energy bar. The sleeves of the sports sweatshirt are finished with cuffs with thumb holes, which insulate against the cold and keep the sweatshirt in place thanks to them.
