Description

Women's t-shirt brand 4F. The short-sleeved T-shirt is suitable for exercise. It uses 4F Dry technology, which wicks away moisture well and has quick-drying properties. The women's T-shirt has a functional cut that supports movement. The light material is complemented by a ventilation panel made of technical fabric on the back, which ensures the necessary air circulation.

Women's sports t-shirt has a loose and wider cut. Flat seams do not irritate the skin, minimize chafing and ensure maximum comfort during wear. The back part of the training shirt is slightly elongated and will provide better back coverage. The functional T-shirt is intended for all active women.
