Description

Women's thermal T-shirt brand 4F. The thermal T-shirt with long sleeves will impress you with its nice design and functional features. It is suitable as a bottom layer, for example under a ski jacket. Thermal underwear will provide you with the necessary thermal comfort during your favorite winter activities. Thanks to the 4F Skin technology, the pink t-shirt hugs the body and is very comfortable to wear. With the help of quick-drying fibers and 4F Dry technology, it wicks away moisture well.

Women's thermal underwear 4F is seamless and flexible. It will adapt to your body and you will feel like a second skin. The soft knit fabric does not cause chafing and is safe for the areas most exposed to irritation. The close-fitting cut of the thermal T-shirt is designed so that it does not hinder movement, but sits well on the figure. Raglan sleeves also help with this. Women's thermal underwear will keep you dry and warm in all circumstances.
