Description

Women's pants brand 4F. Ski pants for ladies have a universal black color that is easy to combine. The pants also delight with their functional properties. They are sufficiently breathable and have a NeoDry membrane with a water column of 10,000 mm. This ensures that they are waterproof and that you feel dry. The women's waterproof pants have also undergone a water-repellent DWR treatment, thanks to which water does not soak into the bottom, but flows over the surface. Women's ski pants also have taped seams that seal well.

Women's warmers have adjustable straps. The belt can be individually adjusted thanks to the elastic Velcro fasteners on the sides. The advantage is two side zipper pockets and side zipper ventilation holes. The lower part of the black ski pants is reinforced to prevent damage to the edges of the skis. It is possible to unzip them and easily put on ski boots. Snow sleeves are built into the snow pants, which prevent cold air and snow from entering.
