Description

Men's footwear brand Anta. Sports sneakers for men who like an active lifestyle and comfort in one. The sneakers have a durable upper, which, thanks to the breathable technical mesh material, will provide the necessary air circulation. The black sneakers have a reinforced tip with additional material that protects the toes and at the same time extends the life of the sports shoes. Men's boots will also provide the necessary support for the middle part of the foot.

Men's sneakers have laces. The black boots have an Auto-arch midsole, which gently cushions and ensures shock absorption. You can thus comfortably devote yourself to your activity. A padded collar and a comfortable insole also contribute to comfort during wear. The back part of the heel is extended, so the stylish sneakers are easy to put on and take off. The rubber sole holds well on the surface. Black boots are suitable for free time, exercise or outdoor workouts.
