### Description

Fundango women's jacket. The ski windbreaker will attract attention with a distinctive pattern that resembles a camouflage pattern. An interesting feature is the large pocket on the front. The ski windbreaker also has side zippers for easier dressing and undressing. Thanks to the hood, the ski jacket protects the head from cold and wind.

The strength of the women's windbreaker is the Dripex membrane, which ensures waterproofness and breathability. The waterproof jacket has an adjustable bottom hem with a drawstring. The zippers on the windbreaker are water resistant. The branded jacket for ladies is a great choice for winter sports and winter outdoor activities.
