Description

Women's sweatshirt by Northfinder brand. The trekking sweatshirt impresses with its modern outdoor design. The construction of the hiking sweatshirt is designed with an emphasis on wind resistance. Thanks to the classic cut, it is suitable for every body type. The benefit is the anti-pilling treatment of the material, which extends the life of the sweatshirt.

The plus of the sweatshirt for the forest is that the most stressed parts are reinforced for a higher level of resistance. Pre-shaped sleeves contribute to a wide range of movement. The women's trekking sweatshirt will keep you warm in bad weather. The built-in hood comes in handy when the weather suddenly deteriorates. Two side pockets provide storage space for a mobile phone, coins and other small items. Brand sweatshirt for ladies is a reliable choice for trekking, camping, hiking trips and outdoor activities.
