**Suggested retail price:** 174.99 € s DPH

### Description

Women's jacket by Northfinder brand. The ski jacket for ladies has a timeless design and clean lines. Its cut flatters the female figure and the warm synthetic fleece filling adapts to movement and provides the necessary thermal comfort. The winter jacket has a membrane with a water column of 5,000 mm and a hydrophobic treatment. The black windbreaker has taped critical seams, so no weather will surprise you.

The ski windbreaker fastens with a zipper, which is lined with an inner protective layer against the wind. The YKK zipper is finished with a high collar. The built-in hood has artificial fur, which is very trendy, but can be unfastened. The branded jacket has two outer and two inner pockets. Its sleeves are finished with inner cuffs with thumbholes that insulate against the cold. Of course, there is an inner snow belt with snap fasteners. The ski jacket has an adjustable bottom hem.
