Description

Women's jacket by Northfinder brand. The hiking jacket is distinguished by the possibility to wear it on both sides and thus choose a favorite color according to the current mood. You can wear it as a blue cyan or black jacket. The women's windbreaker has trendy stitching. A bonus is its water-resistant DWR treatment, which was used without PFC compounds. The women's jacket closes with a YKK zipper and its additional advantage is a high collar and a built-in hood.

Double-sided women's jacket is of light construction. It can be easily packed, so you can always have it at hand in your backpack and take it out when needed. The windbreaker for the mountains has a warm filling made of imitation down, thanks to which it provides the necessary thermal comfort. The women's quilted jacket has two outer pockets with a zipper. The sleeves and hem are finished with elastic bands, so they stay in place and insulate against the winter.
