Description

Men's jacket by Northfinder brand. The ski jacket will attract attention with its trendy appearance. The black-red version is timeless and still modern. The strong point of the ski jacket is the 2-layer material with excellent functional properties. The men's ski windbreaker is waterproof and breathable at the same time. Underarm zipper openings also contribute to excellent air ventilation. In addition, it also pleases with very good wind resistance.

The men's ski windbreaker has two side pockets, a pocket for glasses and a pocket for a ski pass. The advantage of the men's ski jacket is that the critical seams are taped. A bonus is the headphone holder. YKK zippers are extra durable. A white and red windbreaker is a great choice for skiing.
