Description

Women's jacket by Northfinder brand. The ski windbreaker appeals with special technologies that are a support for sports in the winter season. Primaloft synthetic insulation warms pleasantly, allows for excellent air circulation, and also dries quickly. The strength of the ski jacket is the Dermizax membrane, which guarantees waterproofness and wind resistance. Part of the ski jacket is the Recco avalanche search system.

Thanks to its high water resistance and breathability, the women's windbreaker for skiing is a reliable companion for winter sports. The branded jacket attracts attention with its beautiful artificial fur, which is detachable. A snow jacket for ladies is a guarantee of a high degree of movement. YKK zippers are extra durable. You'll be the star of the slopes in this black windbreaker for women.
