Description

Merrell women's shoes. Women's hiking boots in a trendy color design are intended for hiking, camping or other stays in nature. The Merrell Moab model has a waterproof Gore-Tex membrane, which will keep your feet dry even during adverse weather. The advantage of low hiking boots is a supportive and comfortable insole and a soft midsole made of EVA foam. It will provide you with maximum comfort when tackling hiking trails. In addition, the Vibram sole ensures excellent damping, traction and grip. It goes all the way to the toe in the front for additional protection.

Merrell shoes have an upper made of a combination of textile and suede and are sufficiently breathable. Classic lacing allows you to adjust and tie Merrell shoes as needed. Low hiking shoes have a sewn-in padded tongue that prevents dirt and moisture from entering the bottom. Kinetic Fit™ technology helps prevent leg fatigue. Women's hiking boots also feature Merrell Air Cushion cushioning, which provides additional stability and shock absorption.
