**Description**

Bauer hockey skates. Men's skates are intended for recreational hockey. They appeal with a modern design and high-quality execution. Ice skates are easy to put on and provide support, flexibility and comfort during play. The Bauer Vapor model has a traditional construction, suitable for narrower feet. The skeleton of Vapor skates is 3D shaped and made of polycarbonate. The sole is made of durable plastic and the tip of the shoe has a standard design.

Hockey skates have a microfiber lining that absorbs moisture in the shoe to keep it as dry as possible. The ankle padding consists of light memory foam for optimal comfort and securing the heel. Comfort is also provided by the felt tongue, which in addition to comfort also has a protective function against impacts. Bauer skates have a stainless steel blade. These are great looking skates with a more traditional look.
