**Description**

Merrell women's shoes. Women's hiking boots in a nice feminine design were designed with the anatomy of the female foot in mind. These low-top hiking boots fit the foot like a sneaker and hug the ankle without feeling stiff or tight. Women's hiking boots have a textile knitted upper that will provide the necessary breathability. Tying on 100% recycled laces allows you to customize them perfectly. Merrell shoes have a reinforced heel, thanks to which the foot will be stable and strong.

Merrell shoes have a padded shoe collar and a soft, comfortable tongue. The comfortable textile lining is also 100% recycled. As well as a comfortable inner EVA insole. Forest shoes use Merrell Air Cushion™ cushioning, which is in the heel area and ensures stability and shock absorption. In addition, the very grippy Merrell Quantum Grip™ rubber outsole offers sure-footed traction on all types of terrain. These women's trekking shoes are suitable for all women who like to conquer mountain trails.
