### Description

Bauer men's skates. Hockey skates for men are intended for beginners who are about to take their first steps on the ice. They are made of durable one-piece 3D POLYCARB polycarbonate shell, thanks to which the shoe fits better in the ankle area, is also light and offers increased comfort and flexibility. The shoe is adjusted to hold the foot at the correct angle. The inside is padded with a pleasant microfleece material that dries quickly.

Hockey skates have an anatomically shaped tongue with an external instep protector. It protects the leg from puck impacts. Bauer skates have a tip made of hard plastic. The leg and fingers are thus protected from cuts or other impacts during the game. Men's hockey skates have a sole made of TPR material, which prevents it from undesired twisting. At the same time, it ensures the best possible transfer of energy expended by the player to the knife. Men's hockey skates have a TUUK LIGHTSPEED PRO II & STAINLESS STEEL blade, which is longer than skates for advanced skaters. It will help you maintain stability and you will learn the first steps faster.
