Description

Buff brand scarf. The multifunctional scarf has a timeless design that will always be trendy. The ThermoNet® neck warmer was designed to provide excellent protection against the cold. It impresses with its low weight and excellent thermal properties. The Buff neck warmer is extremely warm and versatile. It is suitable for various outdoor activities in cold weather, such as running, hiking, cycling or riding a motorcycle. ThermoNet® technology makes it possible to create 4 times warmer microfibers and thus provide maximum thermal comfort.

The multifunctional neckband is highly breathable and quick-drying. Thanks to its properties, it guarantees super comfort and the necessary protection against wind and cold. The multifunctional scarf for both ladies and gentlemen was also made from recycled materials.
