### Description

Bolle junior ski helmet. The RYFT ski helmet is now available in a junior version. The ski helmet offers an in-mold construction characterized by its lightness and active ventilation system. The size adjustment system and premium design make it the most comfortable and captivating ski helmet.

The adjustable ventilation system is easy to use and allows you to regulate the amount of air flowing through the helmet. By opening the channels under the shell, it can be fine-tuned to achieve the right level of ventilation for optimal comfort.

The Click-To-Fit™ system makes it quick and easy to adjust the fit of the helmet. The adjustment knob allows you to tighten or loosen the helmet effortlessly, even with gloves!
