Description

Bolle ski helmet. The ski helmet stands out with its modern design and durable AVID Progressive EPS construction. The unique and patented active ventilation system of the Air Extractor panels provides unprecedented airflow, making the RYFT MIPS® the most ventilated helmet Bollé has ever designed. This hybrid ski helmet is equipped with the MIPS® system, meeting the highest standards of impact protection for safe riding in any conditions.

The white ski helmet has a comfortable inner insole that you can remove and wash. Removable ear cups are also an advantage. At the back of the Bolle helmet there is a clip for attaching ski goggles. The ski helmet is suitable for both ladies and gentlemen and should be an integral part of your ski outfit.
