Description

Bolle ski helmet. The ski helmet stands out with its modern design and durable ABS construction together with the AVID Progressive EPS system. The unique and patented active ventilation system of the Air Extractor panels will provide unprecedented air circulation, making the RYFT MIPS® the most ventilated helmet Bollé has ever designed. This hybrid ski helmet is also equipped with the MIPS® safety system. Meets the highest crash protection standards for safe driving under any conditions.

The black ski helmet has a comfortable inner insole that you can remove and wash. Another advantage is the removable ear cups. At the back of the Bolle helmet, there is a practical clip for attaching ski goggles, which you will appreciate in wind, rain or bright sun. The ski helmet is suitable for both ladies and gentlemen and should be an integral part of your ski outfit.
