### Description

Bolle ski helmet. The black helmet has a matte look and looks very stylish. Thanks to its in-mold construction, it is very light and absorbs shocks well. It has an active ventilation system with 8 vents and together with the adjustable Air Extractor ventilation with air extraction channels, it is a well-ventilated helmet. This model is also equipped with MIPS® technology and the passionate progressive EPS technology to ensure the maximum level of safety. The Click-to fit system for individual adjustment guarantees a perfect fit.

The Bolle helmet has a soft fleece lining. The 3D earcups, which provide exceptional comfort, are also an advantage. The back clip for attaching ski goggles is also an advantage. The Bolle ski helmet is definitely a suitable companion for all skiers.
